Barbara Marshall good luck to you

Lindell Johnson - Thanks, I'll need it.

Gwynn Socolich - I have Pinnacle Studio how does this rank in the video recording realm? I made a video for moms memorial two years ago. It took me a week.

From Lisa: I used Pinnacle many years ago. It was a good program but challenging. I love all the free video tutorial support that Camtasia offers.

John Schmidt - The more powerful the more difficult to master. Pinnacle is a decent program.

Gwynn Socolich - @John Schmidt thanks for the advice

MargtheCar - And 8mm film does not last forever. Get it transferred now!

John Schmidt - QUESTION: So where did you store this and how will others know it is there in the future?

Hilary Gadsby - Just remembered we have some Hi 8 video we need to digitise ASAP

MargtheCar - Also, single burned DVDs (non commercial) go bad after 5 to 10 years, no matter what the company says. Make sure you also have mp4 copies backed up on your computer and a cloud service

Gwynn Socolich - Hubbys grandpa worked in Sacramento on railroad as blacksmith helper. Love your Video Lisa!

From Lisa: Small world! My grandfather started on the Feather River line but spent most of his career out of Stockton, CA.

Cindy Suda - Thank you for another great genie tea, Lisa! So looking forward to more step by step. Do you have any resources for learning this on an iPhone? <3

From Lisa: Adobe Spark Video is a free app. It does put a small watermark on the video unless you pay for a monthly subscription that I think is about \$9.99. I hope to cover creating a video in Spark soon on the show. Google Photos can also create short videos using your photos and videos. There is a chapter on Google Photos in my book *The Genealogists's Google Toolbox*, 3rd edition. You can download the free Google Photos app to your iPhone.
